Local Food Directories: National Farmers Market Directory

The Farmers Market Directory lists markets that feature two or more farm vendors selling agricultural products directly to customers at a common, recurrent physical location. Maintained by the Agricultural Marketing Service, the Directory is designed to provide customers with convenient access to information about farmers market listings to include: market locations, directions, operating times, product offerings, accepted forms of payment, and more.

Visit our [Local Food Directories page](#) to find other operations offering locally grown products. If you are a market manager visit our [Local Food Directory Registration & Update page](#) to add or update a market listing. An [API](#) is available for developers to integrate this data into other applications.
